ZF Scan integrates legacy tools for streamlined diagnostics, supporting modern trucks with advanced features and security standards

ZF Aftermarket has introduced ZF Scan, a new diagnostic solution tailored for commercial vehicles, marking its debut in North America. This launch is part of the ZF [pro]Diagnostics portfolio and aims to offer a diagnostic experience for modern, complex trucks and trailers. The unveiling of ZF Scan took place during the ongoing Heavy Duty Aftermarket Week (HDAW) 2026, held from Jan. 19–22 in Texas, US.

The company said ZF Scan consolidates multiple legacy diagnostic tools, such as WABCO TOOLBOX PLUS and ZF Testman, into a single platform that includes new and future diagnostic modules. It allows technicians to perform comprehensive vehicle health scans, clear fault codes, adjust parameters and support electronic control unit (ECU) flashing as needed. The solution is compatible with a wide range of ZF systems, including braking, transmission, chassis and advanced driver assistance technologies.

In a statement, Anuj Gupta, head of Digital North America for ZF Aftermarket, emphasized the importance of keeping pace with the growing integration of systems and software in commercial vehicles. He explained that ZF Scan presents a modern, integrated diagnostics solution to help fleets, workshops and distributors diagnose and service the diverse ZF product portfolio with increased speed, precision and confidence.

Chris Battershell, head of Aftermarket North America, stated that ZF Scan is integral to ZF Aftermarket's broader strategy aimed at supporting the entire commercial vehicle service ecosystem with original equipment-engineered parts, digital tools and technical expertise.
